

## Community mapping of AMR risks Mweya area, Uganda

Good access  
to clean  
water but  
poor sewage  
systems.

Heavy metal waste  
from hillside mines

Agri-pesticide usage  
increasing with run-off  
into lakes and  
protected areas.

Poaching activities cause  
injuries to wildlife and  
rangers

Antibiotics demanded by communities  
& over-the-counter sales of  
antimicrobials by untrained staff

People and  
wildlife  
fleeing  
conflict in  
DRC

High numbers of tourists  
often taking antimalarials
