

Tapeworms

The background is a dark grey color with several stylized illustrations of tapeworms and their eggs. The tapeworms are depicted as long, segmented, pinkish-red worms, some coiled and some straight. The eggs are shown as circular structures containing smaller, curved, pinkish-red shapes. The overall style is simple and educational.

TYPE: Microbe

THEME: Parasite

- ◇ I am a parasite
- ◇ I am a very big microbe
- ◇ I live inside human and animal bodies
- ◇ I can make people and animals very sick.
- ◇ Antiparasitic medicines can be used to help people and animals get better.
- ◇ Veterinary health professionals may advise farmers to give antiparasitic medicines (also called anthelmintics) to protect animals against catching tape worms.
